

# Mobile Applications Development

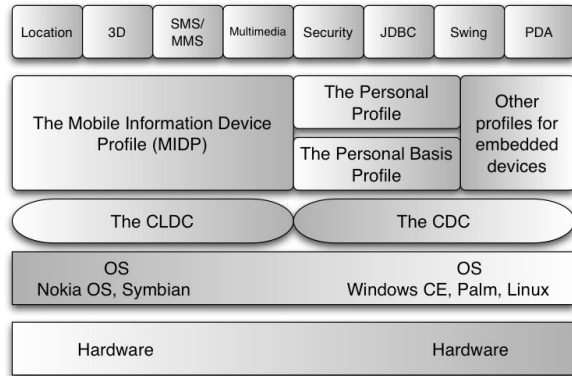

As is clear from the studies done by Gartner, people would be accessing information more on handheld devices as compared to conventional access on PC. For such a scenario, if you do not have presence in the mobile Internet market, you can yourself judge what that means to your business. We helps businesses to mobile enable their core services. With our expertise you can reach your customers at anytime as well as anywhere. Services like travel facilities, hotels and airlines are the most sought after by the people on move. Giving your customers to contact you while they are on move would make it very convenient for them while at the same time it means more business for you.

### Advantages of mobile applications

- New market opportunities.
- Ubiquitous computing.
- Information access anytime anywhere.

### We offer:

- Mobile application and peripheral development using C#, .NET Compact Framework application development and J2ME and J2EE Environments.
- Mobile Graphical User Interface (GUI) design and customization.
- Migrating applications to Windows Mobile and Java-enabled handhelds platforms.
- Application porting of widely used mobile applications such as Mobile Field Service, Direct Store Delivery, Mobile Asset Management.
