

## QA & Software Testing

In the globally competitive software industry, quality is vital for success. Validation & Verification is the cornerstone of good quality software. We are committed to reduce test cycle time, increase product quality resulting in higher customer satisfaction by offering standard and customized testing services globally for the mission critical applications and web applications.

### We offer:

- QA partnership
- Testing plan
- Manual Testing
- Automated Testing
- Debugging & Environment Testing

### QA Partnership

A partnership can be worked on with your software development team to plan, execute and manage your application testing. The united effort will produce high quality software.

### Testing Plan

We bring into being a complete software test plan plus other documentation for your software applications on the basis of IEEE standards on software development.

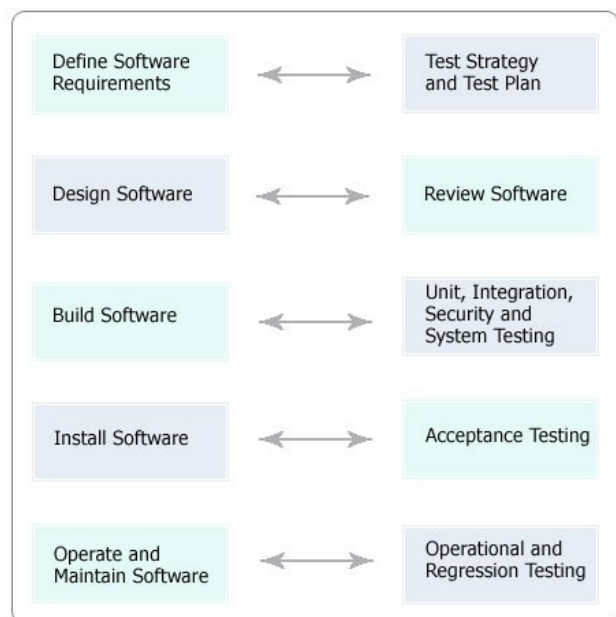

- Generic Software Test Plan and Schedule
- Details of Test cases
- Specification of Software Test Procedures
- Regression Software Test Plan and cases
- Acceptance Testing Guidelines
- Test Log and Defect Reports

### Manual Testing

Both clients and our programmers carry out unit testing and code checking during coding. We aid you in this by providing your software development group with guidelines, test cases and procedures. Our services includes the following tests: integration, system, regression, modification, performance, stress, usability, acceptance, release.

### Advantages of QA & Software Testing

- Quality in software development
- Low incidents or bugs
- High security
- Low maintenance cost and actualization
- Low use of resources
