

Distributed and Web based Applications

We build websites for any size business or organization. We can offer a solution to fit any budget. Functionality of web applications and distributed between multiple applications can reside in one or multiple computers.

XML Web Services (platform independent)

We offer complete technology strategy & integration services that are specially tailored to suit your particular requirements. The new platform independent web services technology is changing the way applications and devices work together to build connected solutions

Web Applications - a type of distributed application

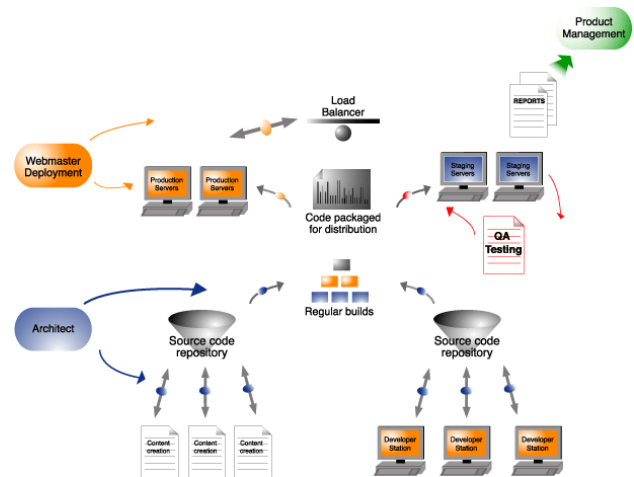

The typical web applications architecture uses a web server and a database server. Web applications architecture is a great solution for surfacing data to employees in branch offices, vendors and to the public. For accessing information at the right place at the right time; choose the right architecture for your applications. So let us put our heads together to discuss your web applic
