Files			
No.	Files	Size*	Last Modified
1	C:\Test\lib\ DANIEL_A.BAK		

Files			
No.	Files	Size*	Last Modified
1	C:\Test\KING1.BAK -> C:\Test\lib\		

Main features

- Efficient storage
 - Centralized storage. You'll be able to centralize your bussiness archives in a single system or in a farm of servers easing their administration and minimizing costs.
 - 24/7 availability, with the option of server farms, securing access to your data the 24 hours of the day, the 7 days of the week.
 - SQL DB server. Safe and trustworthy.
- Safeguarding and restoring
 - Automated and centralized safeguarding. You'll be able to keep backup copies of all the information of your corporation. The workstation archives are automatically stored in the central server without the need of human intervention.
 - Archive history. You'll be able to recover even the old versions of your files without the need of any additional configuration.
 - Multiple methods of storage. You'll be able to backup your information in magnetic tapes or CDROMs.
- Confidentiality
 - Data cyphering. You'll be able to protect your information by cyphering, which will make it impossible to read in the event of theft or other illegal access.
- Compatibility
 - Compatibility with any client, Windows, Linux or UNIX. You'll be able to access your data without any additional configuration.
 - Publishing on the Internet. You'll be able to publish your archives in a safe way in the Internet.
- Offline administration
 - Commandline (CLI) via SSH
 - Commandline (CLI) via Serial Port
 - SNMP support
