

FLOSS Migration

The experts at Flozer work with you to profit of the investment in existing infrastructure, to reach your business goals and ease future expansion using open source software. Flozer uses a focus of probed efficacy to design and implement open source solutions for your corporate problems which will allow you to obtain a quick return of investment. Our exceptional services of formation and technical assistance warrant that the investment continues to provide dividends in the future.

Flozer has methodologies, services and applications which will allow to help you plan and deploy in an automatized manner all the services in your infrastructure. When you've decided on the service type that you want to apply, you'll be able to use our solutions in many ways allowing you complete control without effort.

We practice what we use

Our corporation as a specialist in Free Software does only use free and open technologies. This allows us to do a constant analysis of the solutions in the Free Software market, allowing a technical and economical analysis that clearly justifies the effort of migration.

Stages of implementation

- **Evaluation.** Our team of consultants will consider your goals and analyze your needs for the best adaptation to your current environment
- **Design.** We help you design a migration plan according to your current and future needs
- **Implementation.** We provide formation to your personnel, starting a pilot solution and installing or migrating all the services needed for your work
- **Formation.** We have teams specialized in formation, which will prepare your personnel whatever the interest is, covering both general subjects and certifications
- **Technical assistance.** We offer you technical assistance in many modalities, allowing you to have complete assistance and support for your infrastructures

Your Best Solution

Flozer puts within your reach more options than ever. We help you convert to Free Software in a staircased and systematic way, with the support of our formation and technical assistance services after the implementation, from the same organization that allowed you to move from privative solutions into free software.

The deliverables include:

- Open Source Strategy
- Architecture Design
- Performance/cost Analysis
- Route Sheet for Migration
- Lab of Tests for Migration
- Conversion of Applications and Data
- Tests and Quality Control
- Formation and Post-implementation Assistance
