

## Flozer VideoDefender

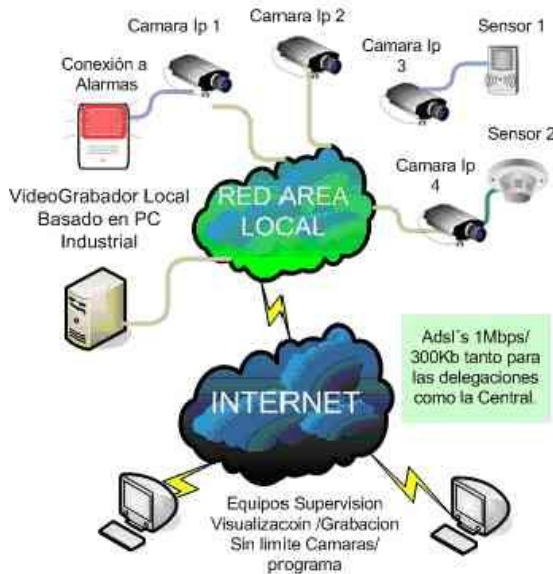

In many places, video surveillance is adopted as the most effective medium to ensure the physical security of their properties or goods. This technology is evolving through integration with IP networks, which allow greater control and less costs of installation, providing physical security to their entire facilities

### The problem

Physical security is very important, mostly in those places, big corporations, urban zones, etc. where we have important actives to protect and physical security errors where individual or bussiness stealing of goods and information cannot be allowed.

### The solution

Integral solution of video surveillance for your bussiness. The system can have a combination of cameras of fixed vision, internal, external, infrared, thermal, etc. The operators can, safe and instantly, see and control the cameras no matter where in the world they're installed. Flozer VideoDefender perfectly integrates in your existant infrastructure, without having to make big changes.

### Highlights

- + Greater control and supervision of your actives and personnel.
- + Easy integration with existing infrastructures.
- + Universal access from any internet link.
- + Low investment and quick return of investment (ROI).
- + Easy installation and manteinance.

**Integral Video Surveillance System**  
“Control its assets and facilities through monitoring by video IP.”

This solution have two flavors  
**Flozer VideoDefender Appliance**  
Integrated Hardware & Software  
**Flozer VideoDefender Stand-alone**  
Installed Software on generic hardware  
Ask us about this flavors.

# Flozer VideoDefender

## Main features

- Support video, USB, IP and wireless cameras.
- Remote control of cameras (Zoom, Adjust, Rotation).
- Database as the storage system.
- Definition of multiple sectors for cameras.
- Video streaming support.
- Configuration of alarms and monitorization through events.
- Mail and SMS notification.
- Support for domotics' protocols like X.10.
- Multiple users and different access controls.
- Automatization of tasks through scripts.
- Remote access from cellphones and PCs.

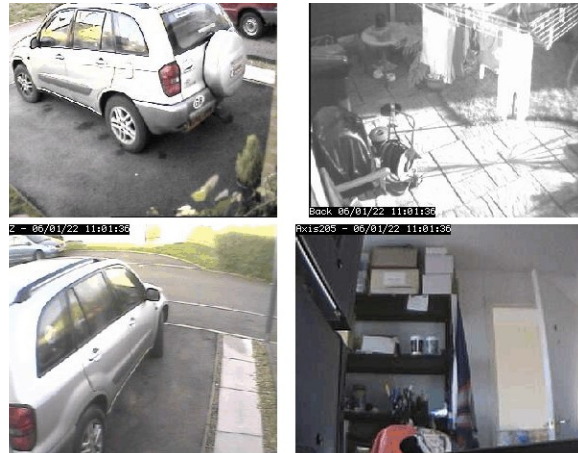

## Components

Flozer VideoDefender comes with the following components:

- **Digital Video Recorder (DVR).** System for recording digital video with support for analog and digital IP Ethernet/USB/Wireless cameras.
- **Network Video Recorder (NVR).** System based in Ethernet networking for storage of video from IP cameras.
- **Control center.** A web application software to handle and control the cameras, events and recordings.
- **System of notifications and alerts.** A system to send notifications of events though email or SMS.
- **System of Movement detection.** An integrated system to detect movement through user defined areas.

## Intuitive user interface

Flozer VideoDefender comes with an intuitive web-based user interface to configure and maintain your complete infrastructure of video surveillance.

Through the web interface, you'll be able to:

- Completely configure your whole infrastructure of video surveillance.
- Handle cameras.
- Setup access to cameras.
- Save and browse the video history.
- Define the movement detection areas.
- Visualize more than one source of video at the same time.
- Configure and handle notifications and events.
- Much more...
