2AG eGov Portal ([www.2AGSoft.com/egov](http://www.2AGSoft.com/egov))

2AG Software Factory presents an integral solution for the management of the whole public administration, which will allow you to handle external and internal processes on-demand.

2AG eGov Portal is essentially composed of three components:

- **Neuowork Application Framework.** Neuowork, With the 2AG Software Factory business unit, a framework was developed for the quick development of transactional applications relying in the latest web technologies, while focusing in information security, interoperability and scalability. Neuowork Application Framework is the fundamental stone eGov Portal is built upon.
- **Consultancy of information processes.** The consultants in information technologies of 2AG Software Factory which are specialized in the issues of public administration collect all the key information of your administration and develop the functional, architecture and business model ready to be implemented.
- **Portal module implementation.** Finally, technicians specialized in the current technologies the Neuowork application Framework is built upon implement the Public Management Portal based on the model developed in the previous step.
